SKILLS

Languages
JavaScript, C++

Development
HTML, CSS, JavaScript, React, Next.js, Firebase, MongoDB, REST API, OAuth 2.0

CSS & UI libraries
CSS3, Tailwind, Bootstrap, React Bootstrap, Styled Components

State Management Tools
Redux, Redux-Toolkit, Context API

Others
Babel, NPM, Webpack, Figma(novice), Postman, Git, Github

Soft Skills
Communication Skills, Leadership, Problem Solving, Detail Oriented, Creative

PROJECTS

PokeDex
An interactive app/game to catch and learn interesting information about different Pokemons.

- Used **poke api** and **pkparaiso.com** to build an interactive and fun game where you could explore and catch different Pokemons and save them to your inventory.
- Used **Tailwind** to build a highly detailed, fully responsive and **optimized app for mobile phone** as well. <u>LIVE DEMO</u>

🔗 https://github.com/abhishek1886/pokedex

Poke API, User specific, Firebase, Interactive Game

MAL Playlist
An app to access and create a YouTube playlist of opening themes of user's watched anime.

- Used **MyAnimeList.com and Google's OAuth 2.0** authentication to get access to user's account and fetch the user's watched anime list data using **myanimelist API**
- Created a new YouTube playlist of opening themes of all the anime in the list in real time using **Google's YouTube API.**
- <u>Example Playlist</u> created using the app.

OAuth 2.0, Google OAuth 2.0, Youtube API, MyAnimeList OAuth 2.0, MyAnimeList API

Mail Box Client
An app to send and receive mails in real time.

- Built a app to send and receive mails in **real time** using React, Redux, Redux-Toolkit, Firebase, React-Bootstrap.
- Built highly optimized, efficient and **reusable components**. Built reusable **custom hooks** for different purposes. Added draft feature.
- Used **Redux-Toolkit** to create different **store slices** and combined them all into one central redux store for efficient state management. <u>LIVE DEMO</u>

Custom Hooks, Reusable Components, Redux, Real time update

Expense Tracker
A feature rich app to facilitate seamless expense tracking for users.

- used a **react, redux and bootstrap** to build a responsive expense tracking app
- added **firebase authentication** for a user specific experience
- filter, track and manage expenses

🔗 https://github.com/abhishek1886/expense-tracker-app

Other Projects
Other projects include

- Ecommerce website with different routing pages, **dynamic and static routing**, user specific, cart
- a simple todo app using **Next.js** and **MongoDb database** to add and manage todos

static and dynamic routing, Next.js , MongoDb
